🇪🇬 Egyptian

🎓 EDUCATION

B.Sc. in Communications and Electronics Engineering

Delta University for Science and Technology
07/2022

GPA: 3.103 / 4.0 (Very Good) Graduation Project:
Smart Home Design - Grade: Excellent (A+)

📋 PROFESSIONAL SUMMARY

Junior DevOps Engineer with hands-on experience in AWS cloud infrastructure, containerized environments, and infrastructure automation. Skilled in deploying and managing AWS cloud services including EC2, VPC, IAM, S3, CloudFormation, Lambda, and CloudWatch. Familiar with Docker containers, Kubernetes fundamentals, Linux administration, and CI/CD workflows. Currently advancing DevOps and cloud-native skills through the Digital Egypt Pioneers Initiative (DEPI) with focus on Kubernetes, automation, and scalable infrastructure.

📁 EXPERIENCE AND TRAINING

Digital Egypt Pioneers Initiative (DEPI) - Round 4 DevOps Engineer Track 06/2026

Focus Areas: Enterprise Linux Administration, CI/CD Pipeline Optimization, Containerized Application Deployment, Cloud Infrastructure Automation
Key Achievement: Developed a reusable Ansible role for automated Nginx deployment following Ansible Galaxy best practices.

Digital Egypt Pioneers Initiative (DEPI) - Round 1 AWS Cloud Architect Track 10/2024

Focus Areas:

- AWS Cloud Architecture Fundamentals
- Designing and Deploying Scalable Infrastructure on AWS
- Networking and Security in AWS (VPC, IAM, Security Groups)
- Infrastructure as Code using AWS CloudFormation
- Monitoring and Logging with Amazon CloudWatch

Key Achievement:

- Designed and deployed a secure AWS infrastructure environment including EC2, VPC, IAM roles, and S3 with monitoring and alerting using CloudWatch and SNS.

📁 DEVOPS & CLOUD PROJECTS

AWS Infrastructure Automation Project

- Designed and deployed AWS infrastructure using CloudFormation templates.
- Implemented VPC architecture with public and private subnets.
- Deployed EC2 instances with IAM roles and restricted access policies.
- Created S3 storage with IAM-based access control.

TECHNICAL SKILLS

Cloud Platforms

AWS (EC2, VPC, IAM, S3, CloudFormation, Lambda, CloudWatch, SNS)

Containers & Orchestration

Docker, Kubernetes, Amazon EKS, Amazon Elastic Container Registry (ECR)

Infrastructure as Code

AWS CloudFormation , Terraform

CI/CD & DevOps Tools

Git, GitHub, Jenkins (Basic), CI/CD Concepts, Git_Actions

Web Server

Nginx

Monitoring and management

Prometheus[Grafana] , AWS CloudWatch

Programming & Automation

Python, Bash

Configuration Management

Ansible

Operating Systems

Linux

Collaboration Tools

GitHub

Additional Skills :

- Microsoft Word (Formatting, Tables, Document Design)
- Microsoft Excel (Formulas, Charts, Data Organization)
- Microsoft PowerPoint (Presentations)
- File Management & Internet Usage
- IT && General Cyber Security Concept

LANGUAGES

Arabic

Native

English

Advanced (C)

- Implemented CloudWatch monitoring and SNS alerting.
- Automated infrastructure tasks using Python and Bash scripting.

EKS Cloud-Native Platform (Microservices Voting App)

GitHub: <https://github.com/mohameddraaz53/vois> project

- Infrastructure as Code: Designed and deployed a production-ready EKS cluster, VPC (Public/Private subnets), and NAT Gateways using Terraform with S3/DynamoDB state locking.
- GitOps & CI/CD: Orchestrated automated deployment pipelines using Jenkins and implemented GitOps principles with ArgoCD for seamless application synchronization.
- Container Orchestration: Deployed a multi-service voting app (Flask, Node.js) on Amazon EKS using Helm charts and Kubernetes manifests (Pods, Services, Ingress).
- Traffic Management: Configured NGINX Ingress Controller and AWS API Gateway with Cognito JWT authentication for secure edge-to-service communication.
- Data & Observability: Integrated MongoDB Atlas (Managed DB) and implemented full-stack monitoring using Datadog (Metrics, Logs, APM) and CloudWatch.

Container Deployment Labs

- Practiced Kubernetes concepts including Pods, Services, and YAML manifests.
- Implemented persistent storage using StorageClass and volumes.
- Explored container orchestration and basic scaling concepts.
- Practiced application deployment and container lifecycle management.

Linux & DevOps Automation

- Automated system tasks using Bash and Python scripting.
- Implemented Git-based version control workflows.
- Practiced repeatable infrastructure deployment processes.

SOFT AND COMMUNICATION SKILLS

- **Problem-Solving:** Analytical approach to troubleshooting complex issues in Linux and AWS environments .
- **Effective Collaboration:** Proven ability to work within cross-functional teams to bridge the gap between Dev and Ops.

CERTIFICATIONS

**Infrastructure & Security - AWS Cloud Solution
Admin & Architect**

Digital Egypt Pioneers Program
(April - October 2024)

**Business English Program - Digital Egypt Pioneers
Program**

- **Agile Mindset:** Familiar with Agile methodologies and delivering infrastructure through continuous feedback loops.
- **Adaptability:** Committed to mastering emerging cloud-native technologies and automation tools.
- **Attention to Detail:** Precision in writing Infrastructure as Code (IaC) to ensure system stability
